

ALEKHYA OBINENI

B.Tech CSE | Software Development | Full Stack Development

6302103608 | alekhyaobineni17@gmail.com | LinkedIn | GitHub | LeetCode

SUMMARY

Computer Science and Engineering undergraduate with **8.18 CGPA**, hands-on experience in software development, full-stack technologies, databases, data analysis, and machine learning fundamentals. Proficient in Python, Java, C, SQL, JavaScript, and database technologies, with strong foundations in Data Structures & Algorithms, DBMS, OOP, Operating Systems, and Computer Networks. Experienced in developing web applications, database-driven systems, interactive dashboards, and data analytics projects.

EDUCATION

Vignan's Foundation for Science, Technology and Research (VFSTR) | 2024 – 2028

B.Tech – Computer Science & Engineering | CGPA: 8.18 / 10

TECHNICAL SKILLS

Languages: Python, Java, C

Web Development: HTML, CSS, JavaScript, React

Databases: SQL, MySQL, MongoDB, Firebase

Core CS: Data Structures & Algorithms, DBMS, OOP, Operating Systems, Computer Networks

Data & ML: Data Analysis, Data Visualization, Machine Learning Fundamentals

Tools: Git, GitHub, VS Code, Eclipse, Google Colab, Chart.js

EXPERIENCE

SkillCraft Technology — Data Science Intern

- Performed hands-on data analysis and machine-learning-oriented tasks using Python and Google Colab.
- Worked with Titanic, Bank Marketing, and Accident datasets, performing data preparation, exploratory analysis, and visualization.
- Applied practical data-processing techniques to identify patterns and derive insights from structured datasets.
- Received internship completion recognition and a mentor Letter of Recommendation.

Infosys Springboard — Full Stack Development Program

- Completed a structured Full Stack Development program with a focus on React-based application development.
- Gained practical exposure to frontend development and building functional web applications.

PROJECTS

Emotion-Based Music Recommendation System | Java | Data Structures | DBMS

- Developed a Java-based application that provides music recommendations using emotion-oriented structured data.
- Applied data structures for organized storage and efficient processing of recommendation information.
- Integrated a DBMS backend with a Java-based interface for managing and retrieving application data.

Review-Based Recommendation System | HTML | CSS | JavaScript | MongoDB

- Built a responsive web application for collecting, managing, and utilizing user reviews for recommendations.
- Implemented interactive frontend functionality and integrated MongoDB for persistent storage and retrieval.

Personal Life Analytics & Optimization System | HTML | CSS | JavaScript | Chart.js

- Developed a dashboard-based web application for analyzing personal activity and spending-related data.
- Created interactive charts using Chart.js to visualize categorized data and identify trends.

Household Electricity Consumption Analytics & Demand Prediction | Python | Data Analysis | Machine Learning

- Performed preprocessing and analysis of household electricity-consumption data.
- Applied date/time transformation, aggregation, correlation analysis, and visualization to study consumption patterns.
- Explored relationships between consumption variables and developed a basic demand-prediction workflow.

LEADERSHIP & ACTIVITIES

- **Chief Coordinator — V-Code Fest 2026:** Coordinated technical-event activities and supported planning and execution.
- Participated in technical and hackathon activities involving AI, software development, networking, and application development.

CERTIFICATIONS

- Infosys Springboard — Full Stack Development Program
- SkillCraft Technology — Data Science Internship
- Advanced Communication Skills
